LIMITLESS MODUS

AI-NATIVE ENTERPRISE TRANSFORMATION

Wizard UI Layouts

Self-submission Audit Wizard — Figma Wireframes

Complete UI wireframe coverage for all three audit instruments: Company Audit, Manager Audit, and Engineer Mini-Audit. 54 layout frames drafted in Figma.

Wizard UI Layouts

Date: 2 March 2026 **Figma file:** Open in Figma Desktop → Page "Wizard — Audit Self-submission" **Status:** Complete wireframe coverage — all three wizard flows drafted, ready for refinement and DevExtreme component integration **Based on:** wizard-specification.md, wizard-ui-takeaways-hmrc.md

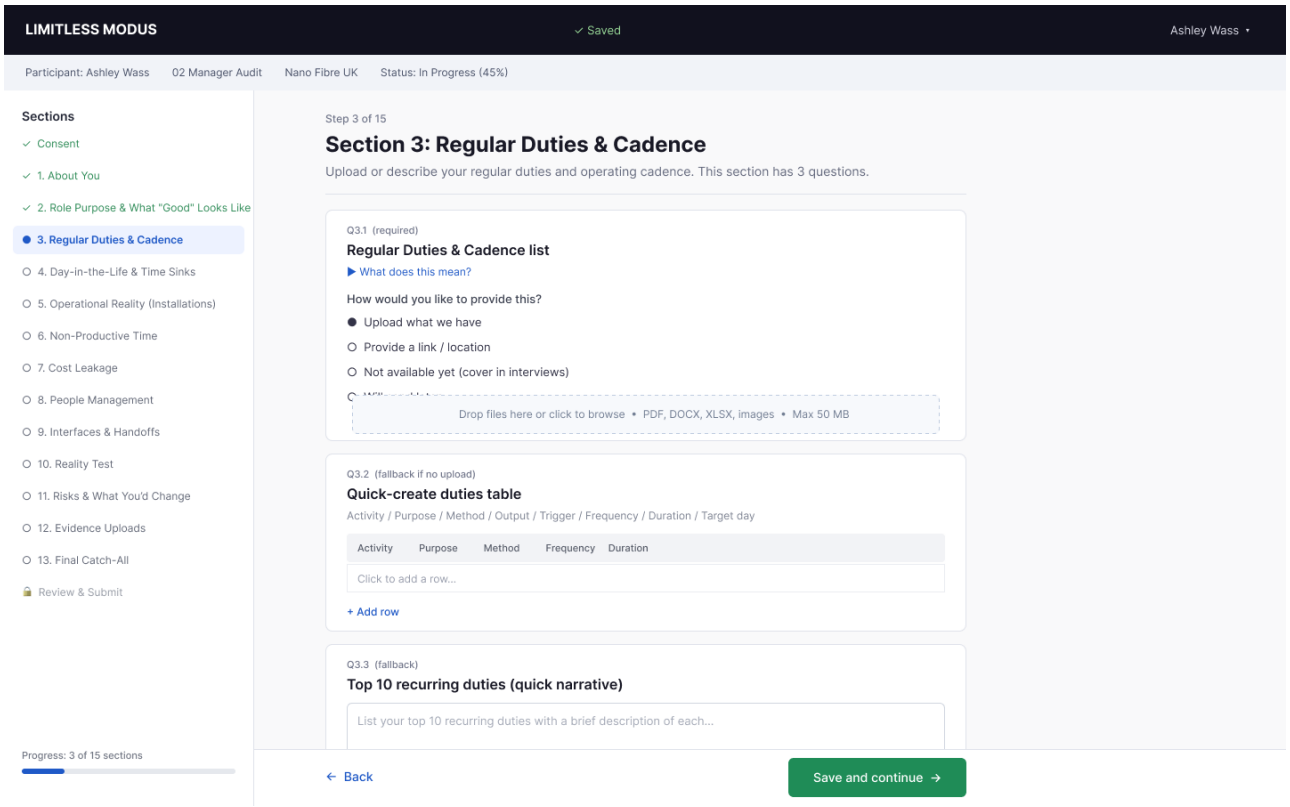
Overview

54 layout frames were drafted in Figma covering the complete Self-submission Audit Wizard across all three instruments:

Section	Layouts	Figma Section
Foundation wireframes	5	Wizard Layouts
Question type patterns	6	Question Type Patterns
01 Company Audit	14	01 — Company Audit
02 Manager Audit	17	02 — Manager Audit
03 Engineer Mini-Audit	12	03 — Engineer Mini-Audit

All layouts use: - **1440px desktop width** (the primary target — mobile is a future consideration) - **Inter font family** (Regular, Medium, Semi Bold, Bold) - **Consistent colour palette:** dark navy topbar `#1E2333`, blue accent `#1E5AC7` for interactive elements, green `#1E8C57` for success/submit, grey `#F5F7FA` background - **Minimal chrome, maximum content** (HMRC takeaway #12) - **Reusable wizard shell** per instrument with sidebar navigation, context banner, progress bar, and bottom nav

Layout 1 — Wizard Shell (Desktop 1440)



Purpose: Establishes the core wizard chrome that wraps every question step.

Structure

Zone	Content
Top Bar	Brand logo "LIMITLESS MODUS", auto-save status "✓ Saved", user dropdown
Context Banner	Participant name, instrument code, engagement name, completion status — always visible
Left Sidebar	Section navigation with completion icons (✓ complete, ● current, ■ pending), progress bar
Main Content	Section header with step counter, description, then question cards
Bottom Bar	"← Back" link + green "Save and continue →" button

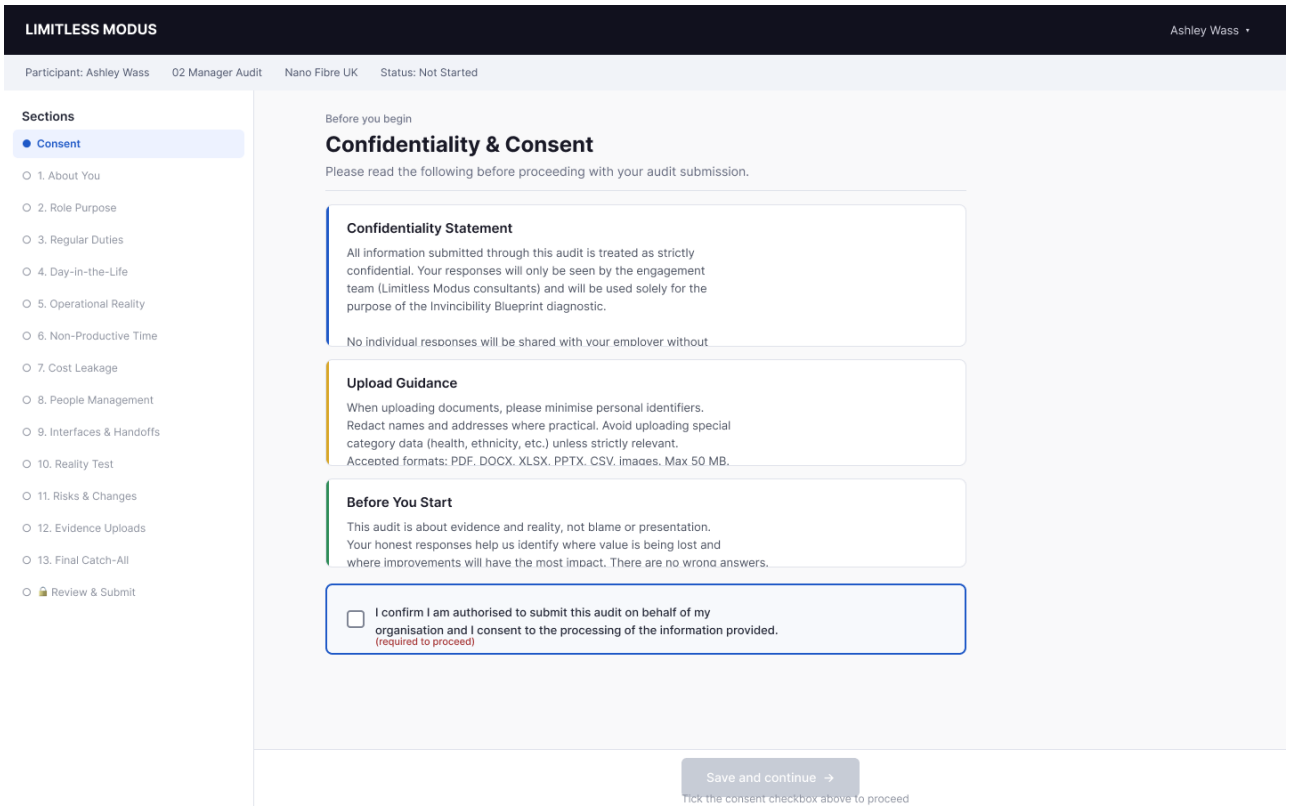
HMRC Takeaways Demonstrated

#	Takeaway	Implementation
1	Persistent context banner	Blue-grey bar below top bar showing participant, instrument, engagement, status percentage
2	Left-hand section navigation	Sidebar with 15 sections + Consent + Review, completion icons, progress bar at bottom
4	"Save and continue" primary action	Green button, bottom-right, consistent on every step
7	Structured data grids (TableGrid)	Q3.2 shows column headers (Activity / Purpose / Method / etc.) with "Add row"
8	Mandatory vs optional distinction	"(required)" label in grey above each question
9	Contextual help	"■ What does this mean?" expandable text under Q3.1
10	Phase transition screens	Section header with step number, title, description, question count, estimated time
12	Minimal chrome, maximum content	Clean white cards, generous whitespace, single-column layout

Question Types Shown

- **Q3.1 — ResponseMode** (required): Three radio options for how to provide information (upload / link / defer), with drag-and-drop file upload zone
- **Q3.2 — TableGrid** (fallback): Column headers with an empty first row and "+ Add row" action
- **Q3.3 — FreeTextLong** (fallback): Large textarea with placeholder text

Layout 2 — Consent Step (Step 0)



Purpose: The gated entry point. The participant must read and accept before any questions appear.

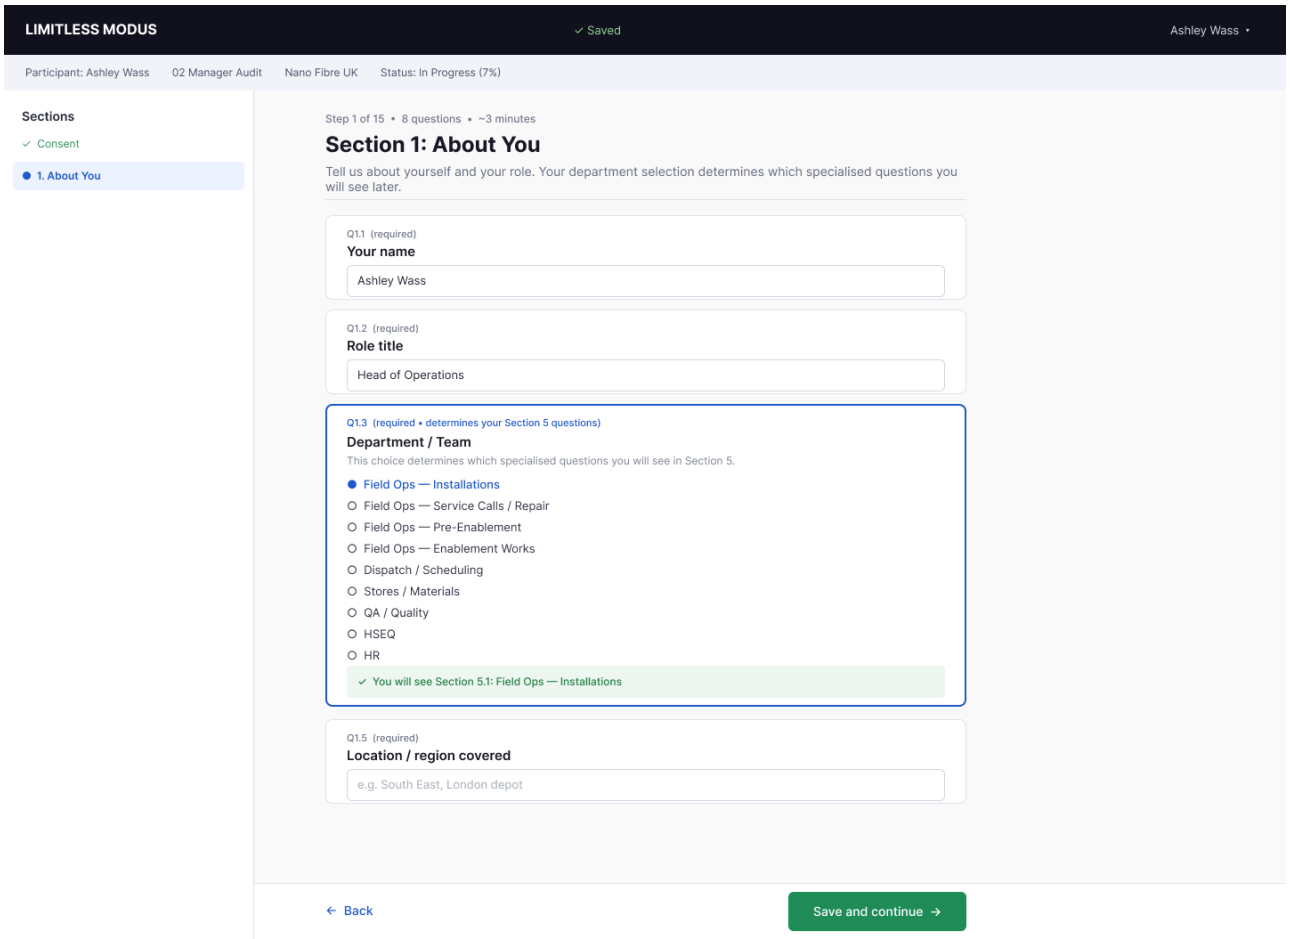
Structure

- **Sidebar:** All sections shown as pending (■), only "Consent" is active (●)
- **Context banner:** Status shows "Not Started"
- **Three information cards** (read-only):
- ■ **Confidentiality Statement** — blue left accent — explains data handling and that individual responses are never shared with the employer
- ■ **Upload Guidance** — yellow accent — file formats, size limits, redaction advice
- ■ **Before You Start** — green accent — sets the tone: evidence over polish, no blame, no wrong answers
- **ConsentCheckbox gate:** Checkbox with explicit consent text and "(required to proceed)" label
- **Disabled "Save and continue"** button with helper text: "Tick the consent checkbox above to proceed"

Design Decisions

- The button is visually greyed out (disabled state) to make the gate obvious
- The consent text is legally precise: "I confirm I am authorised to submit this audit on behalf of my organisation and I consent to the processing of the information provided"
- Colour-coded info cards break up a text-heavy page and create visual hierarchy

Layout 3 — Profile Step (Section 1: About You)



Purpose: Demonstrates a typical question page with mixed input types, including the critical routing question that determines Section 5 content.

Structure

- **Section header:** "Step 1 of 15 · 8 questions · ~3 minutes" + title + description
- **Q1.1 Your name** — FreeText, required, pre-filled with "Ashley Wass"
- **Q1.2 Role title** — FreeText, required, pre-filled with "Head of Operations"
- **Q1.3 Department / Team** — SingleSelect (ROUTING), 10 radio options
- **Q1.5 Location** — FreeText, required, placeholder shown

HMRC Takeaways Demonstrated

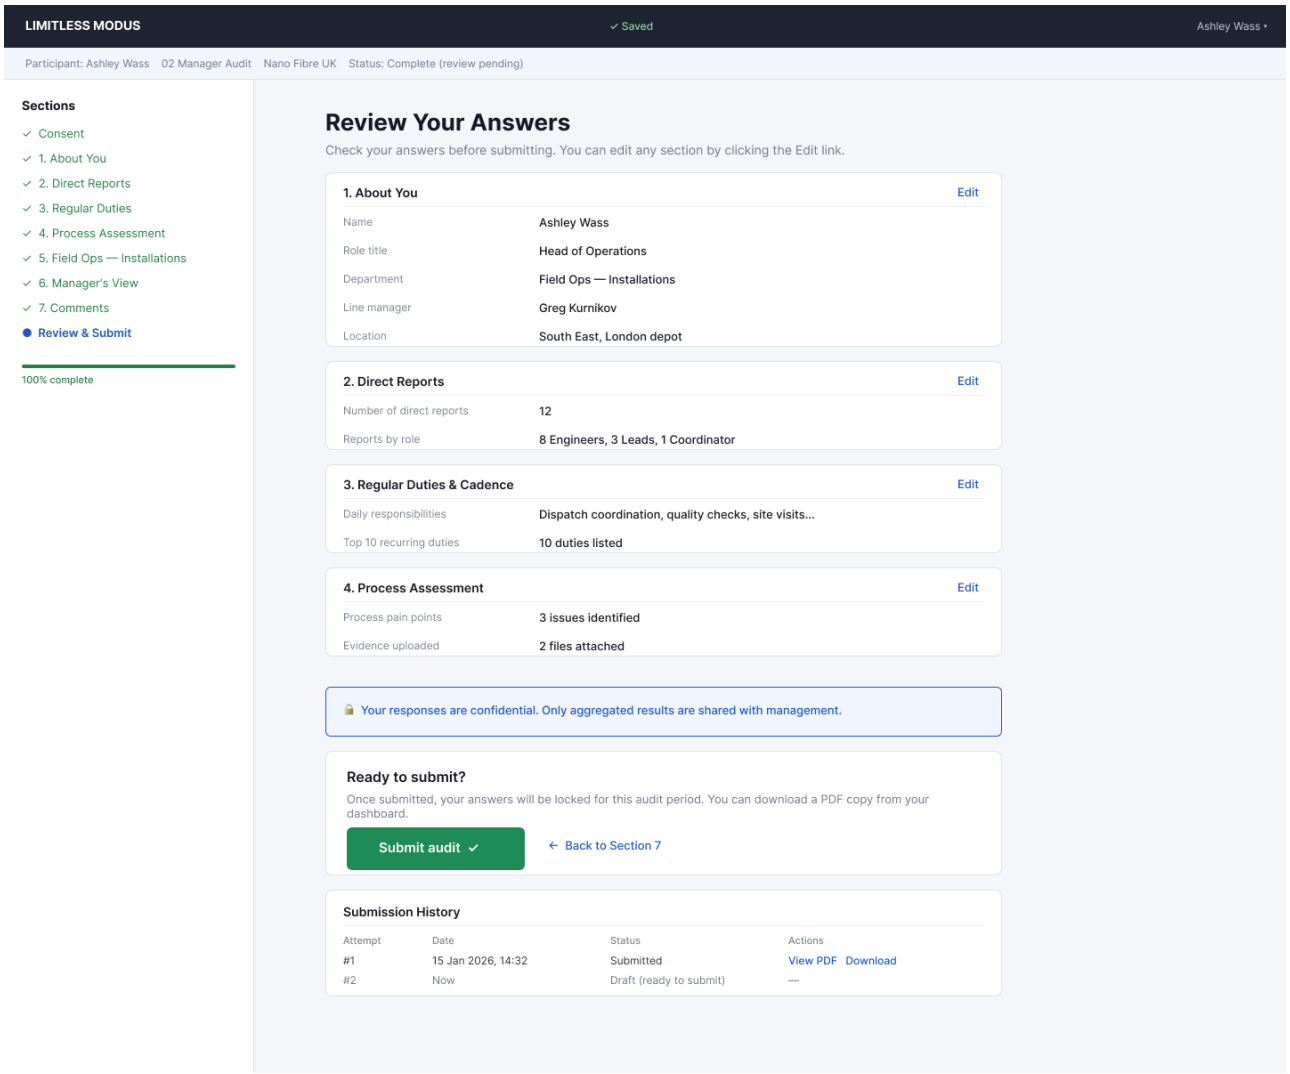
#	Takeaway	Implementation
3	Hybrid "one question per page"	3-5 related questions per page rather than strict one-per-page
6	Answer confirmation (routing)	Green banner below Q1.3: "✓ You will see Section 5.1: Field Ops — Installations"
8	Mandatory vs optional	"(required)" on all fields; Q1.3 additionally notes "determines your Section 5 questions"

Routing Question Design

Q1.3 is visually distinct from other questions: - **Blue border** (2px) instead of grey, drawing attention to its importance - **Blue label text** indicating it affects routing - **Helper text** explaining the consequence: "This choice determines which specialised questions you will see in Section 5" - **Green confirmation banner** at bottom showing the resulting section path after selection

The 10 department options match the specification: Field Ops — Installations, Field Ops — Service Calls/Repair, Field Ops — Pre-Enablement, Field Ops — Enablement Works, Dispatch/Scheduling, Stores/Materials, QA/Quality, HSEQ, HR, Other.

Layout 4 — Review & Submit



Purpose: The final step before submission. Shows all answers in a structured summary with edit capability.

Structure

- **Sidebar:** All 8 sections marked complete (✓ green), "Review & Submit" current (● blue), progress bar at 100%
- **Context banner:** Status shows "Complete (review pending)"
- **Title:** "Review Your Answers" with instruction text
- **Section summary cards** (one per completed section):
- Section name as header + "Edit" link (blue, top-right)
- Horizontal divider
- Two-column layout: question label (grey) | answer value (dark)
- **Confidentiality reminder banner** (blue background): "■ Your responses are confidential. Only aggregated results are shared with management."
- **Submit area:**
- "Ready to submit?" heading
- Warning text about locking answers
- Green "Submit audit ✓" button
- "← Back to Section 7" link
- **Submission history table** (HMRC #11): Attempt number, date, status, actions (View PDF / Download)

HMRC Takeaways Demonstrated

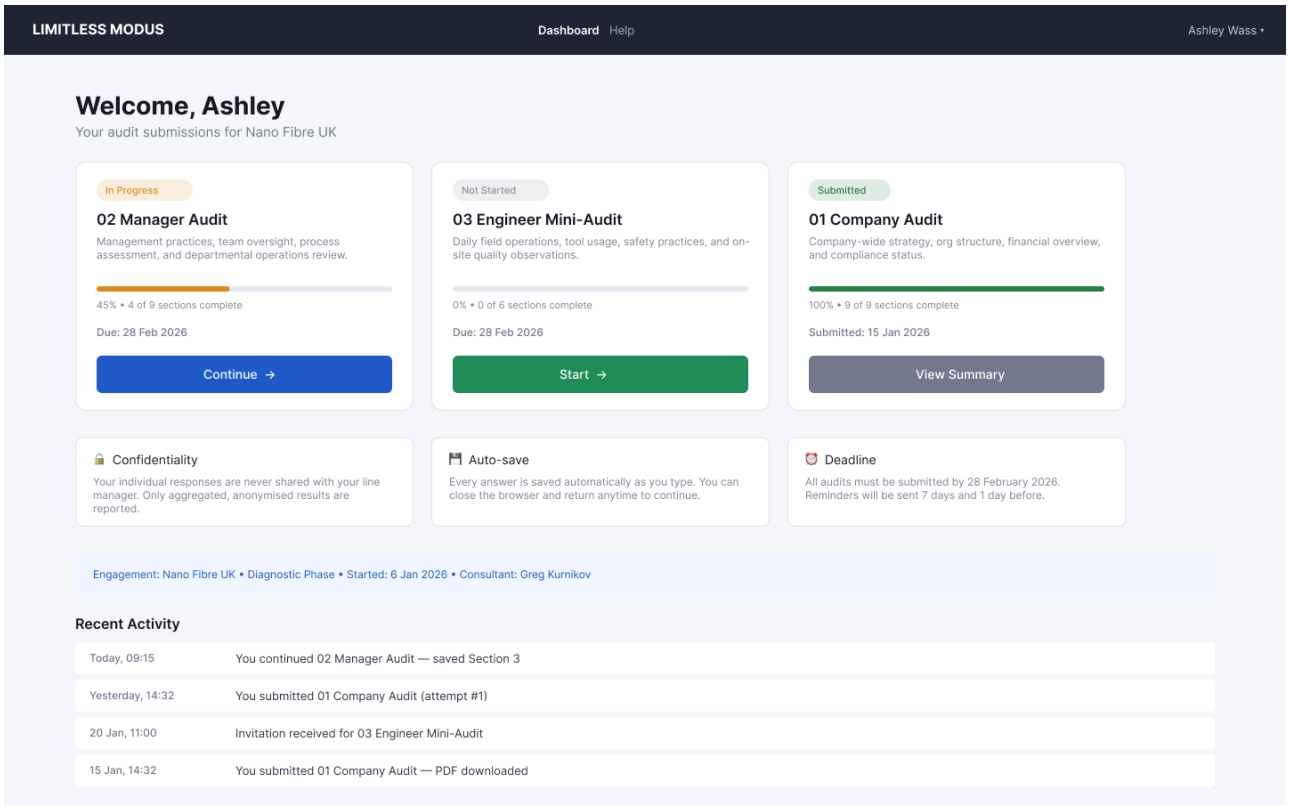
#	Takeaway	Implementation
5	Summary/review pages with Edit links	Four section cards with Q&A pairs and blue "Edit" link per section
11	Submission history view	Table at bottom showing previous submissions with PDF download

Section Summaries Shown

Section	Sample Answers
1. About You	Name, Role, Department, Manager, Location
2. Direct Reports	Count (12), Breakdown by role
3. Regular Duties & Cadence	Daily responsibilities, 10 duties listed
4. Process Assessment	3 pain points, 2 files attached

In the real implementation, all 8 sections (plus Consent) would be shown. The layout demonstrates the pattern with 4 representative sections.

Layout 5 — Participant Dashboard



Purpose: The landing page after SSO login. Shows all assigned audit instruments and their status.

Structure

- **Top bar:** Simplified (no wizard context banner) — logo, "Dashboard" and "Help" navigation, user dropdown
- **Welcome header:** "Welcome, Ashley" + "Your audit submissions for Nano Fibre UK"
- **Three audit cards** showing different lifecycle states:

Card	Status	Progress	CTA
02 Manager Audit	In Progress (orange)	45%, 4/9 sections	"Continue →" (blue)
03 Engineer Mini-Audit	Not Started (grey)	0%, 0/6 sections	"Start →" (green)
01 Company Audit	Submitted (green)	100%, 9/9 sections	"View Summary" (grey)

- **Three info cards:** Confidentiality, Auto-save, Deadline — key reassurances for participants
- **Engagement context bar** (blue background): Engagement name, phase, start date, consultant name

- **Recent activity feed:** Timestamped log of actions (continued audit, submitted, invitation received, PDF downloaded)

Design Decisions

- Cards use colour-coded status badges (orange/grey/green) for instant visual scanning
- Progress bars provide at-a-glance completion awareness
- The "Start" button is green (encouraging), "Continue" is blue (neutral), "View Summary" is grey (archive action)
- Info cards reinforce the three key participant concerns: confidentiality, data persistence, and deadlines

Question Type Pattern Cards

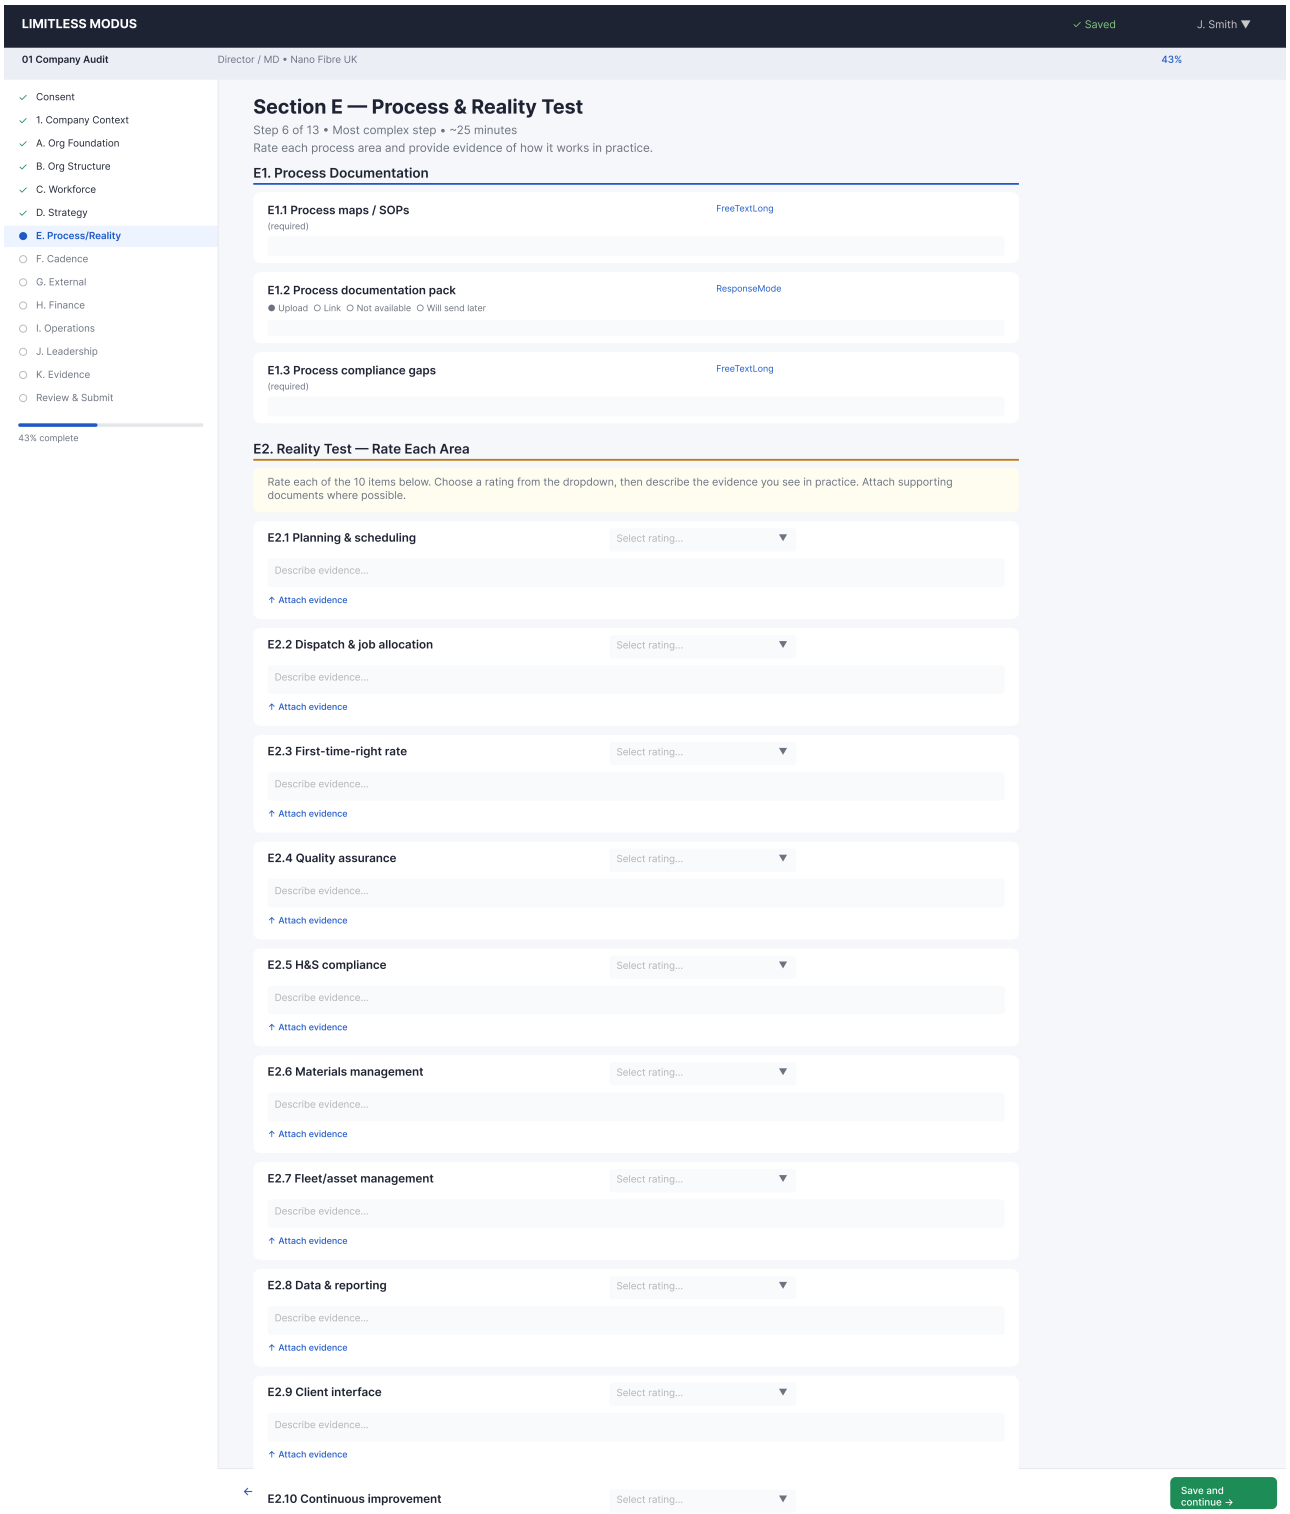
Six new question-type pattern cards were created to establish reusable visual patterns before building full step layouts. Each card demonstrates the input type in isolation.

Pattern	Node ID	Question Types Demonstrated
MultiSelect	`2008:6`	Checkbox grid with "Other" free-text fallback
MultiSelectCapped	`2008:29`	Checkbox grid with blue "Select up to N" cap indicator
RatingScaleWithEvidence	`2008:67`	5-star scale with per-item ResponseMode evidence upload
ChecklistUpload	`2009:101`	Compact checklist rows with upload/link/NA toggle per item
NumberInput	`2009:162`	Numeric stepper with unit suffix
FileUpload (standalone)	`2009:183`	Drag-and-drop zone with file type hints

All pattern cards are in Figma Section "Question Type Patterns" (`2008:2`).

01 — Company Audit Layouts

14 layouts covering the full Company Audit flow (Consent through Review & Submit). This is the largest instrument with the most complex question types.



Representative layout: Step 6 (E — Process & Reality Test) showing the RatingScaleWithEvidence pattern — the most visually complex question type across all instruments.

Node Reference — 01 Company Audit

Step	Section	Node ID	Key Question Types
Step 0	Consent	`2009:204`	ConsentCheckbox
Step 1	A — Company Context	`2009:270`	FreeText, FreeTextLong, SingleSelect
Step 2	B — Org Foundation	`2009:381`	ResponseMode, FreeTextLong, ChecklistUpload
Step 3	C — Org Structure	`2009:525`	ResponseMode, FreeTextLong, ChecklistUpload, TableGrid
Step 4	D — Workforce	`2009:632`	FreeTextLong (x14), ResponseMode (x3), NumberInput
Step 5	E — Strategy	`2009:776`	FreeTextLong, ResponseMode, SingleSelect (OD Stage)
Step 6	F — Process & Reality Test	`2009:885`	RatingScaleWithEvidence, FreeTextLong, ResponseMode
Step 7	G — Operating Cadence	`2009:1037`	ChecklistUpload (11 schedules)
Step 8	H — External System	`2009:1167`	FreeTextLong + ResponseMode
Step 9	I — Finance	`2009:1242`	ResponseMode, FreeTextLong, ChecklistUpload (28 questions, 4 sub-groups)
Step 10	J — Operations Deep Dive	`2009:1445`	FreeTextLong, TableGrid, SingleSelect, ChecklistUpload, ResponseMode (40+ questions, 5 sub-groups)
Step 11	K — Leadership	`2010:1759`	FreeTextLong (x6)
Step 12	L — Evidence Register	`2010:1839`	ResponseMode, TableGrid, FileUpload
Review	Review & Submit	`2010:1962`	Summary cards + Submit

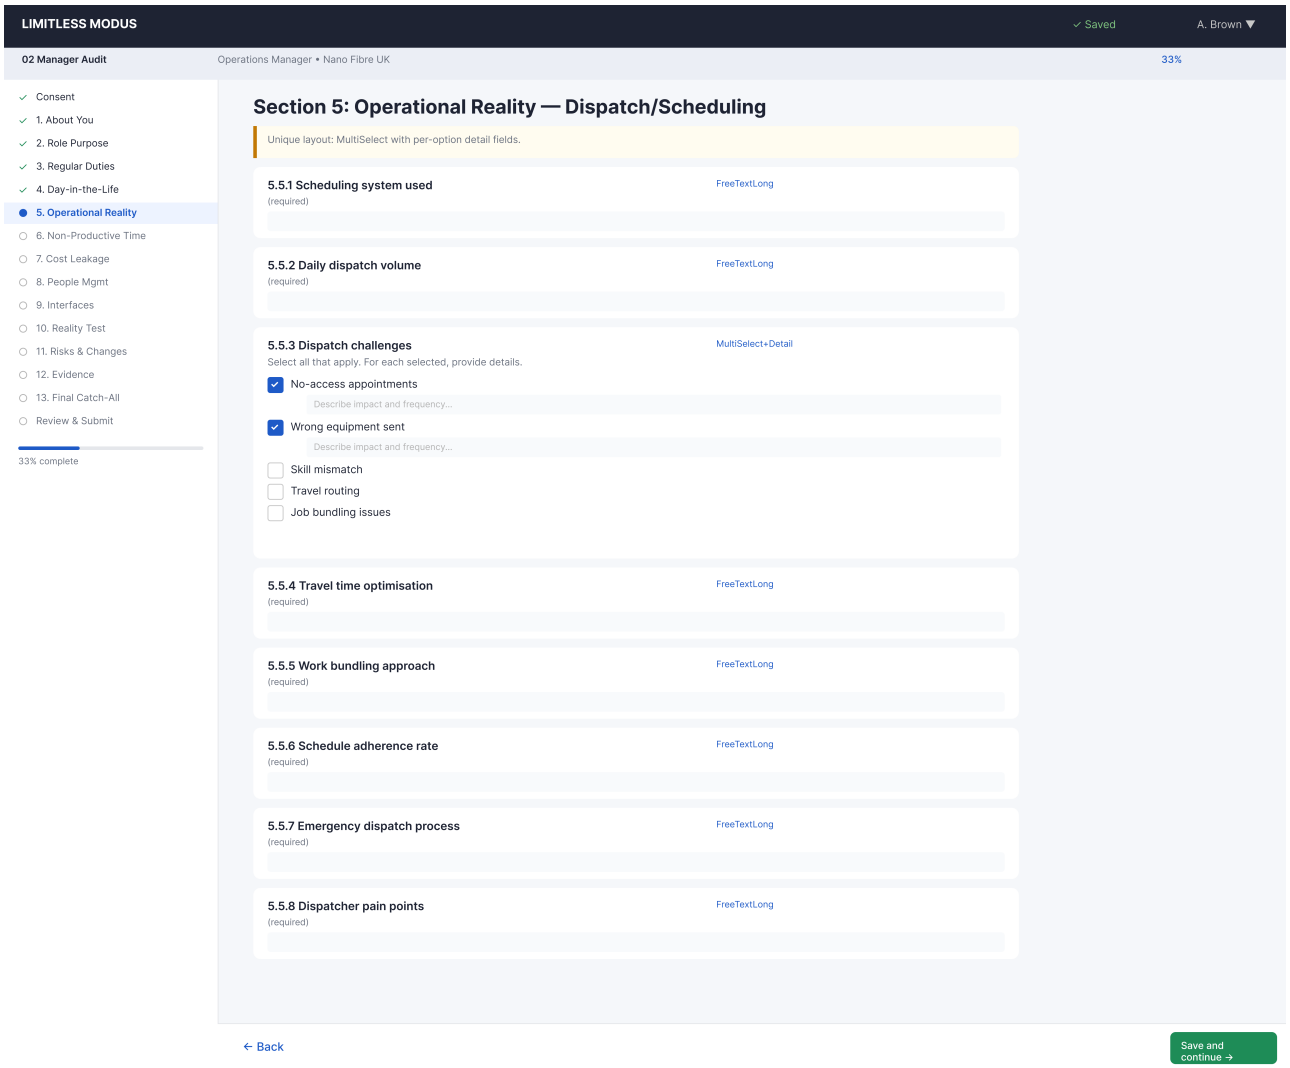
All layouts are in Figma Section "01 — Company Audit" (`2008:3`).

Design Notes — 01

- Steps 9 (Finance) and 10 (Operations Deep Dive) use **visual sub-group dividers** with blue accent lines to break up long content into scannable sections
- Step 6 introduces the **RatingScaleWithEvidence** pattern — the most visually complex question type, with 10 rated items each having a star scale + evidence upload
- Step 7 (Operating Cadence) is a compact **ChecklistUpload**-only step with 11 schedule items
- The Company Audit sidebar has 13 sections plus Consent and Review (15 total)

02 — Manager Audit Layouts

17 layout frames covering 24 conceptual step layouts (15 base steps + 9 conditional Section 5 variants). The conditional variants use a representative layout approach: one template covers the 7 structurally similar variants, plus 2 unique layouts for Dispatch and Stores.



Representative layout: Step 5.5 (Dispatch) — the unique conditional variant showing MultiSelect with per-option detail fields, a pattern not used elsewhere.

Node Reference — 02 Manager Audit (Base Steps)

Step	Section	Node ID	Key Question Types
Step 0	Consent	`2010:2078`	ConsentCheckbox
Step 1	About You	`2010:2134`	FreeText, SingleSelect (routing trigger)
Step 2	Role Purpose	`2010:2210`	FreeTextLong (x4), ResponseMode
Step 3	Regular Duties	`2010:2282`	ResponseMode, TableGrid (fallback), FreeTextLong
Step 4	Day-in-the-Life	`2010:2355`	FreeTextLong, MultiSelect, ResponseMode (16 questions, 3 sub-groups)
Step 6	Non-Productive Time	`2011:2861`	TableGrid (10-row), ResponseMode
Step 7	Cost Leakage	`2011:2985`	FreeTextLong (x4), ResponseMode
Step 8	People Management	`2011:3057`	NumberInput, FreeTextLong (conditional on line-manager status)
Step 9	Interfaces	`2011:3132`	FreeTextLong (x5)
Step 10	Reality Test	`2011:3209`	FreeTextLong (x4)
Step 11	Risks & Changes	`2011:3281`	FreeTextLong (x4)
Step 12	Evidence Register	`2011:3353`	ResponseMode (x7)
Step 13	Final Catch-All	`2011:3440`	FreeTextLong (x2)
Review	Review & Submit	`2011:3502`	Summary cards (14 sections) + Submit

Node Reference — 02 Manager Audit (Conditional Section 5 Variants)

Variant	Department	Node ID	Notes
5.1–5.4, 5.7–5.9	Representative (Installations)	`2011:2493`	Covers 7 structurally identical variants (FreeTextLong + ResponseMode)
5.5	Dispatch/Scheduling	`2011:2584`	Unique: MultiSelect with per-option detail fields
5.6	Stores/Materials	`2011:2696`	Unique: 21 questions across 3 sub-groups (5.6 + 5.6B + 5.6C)

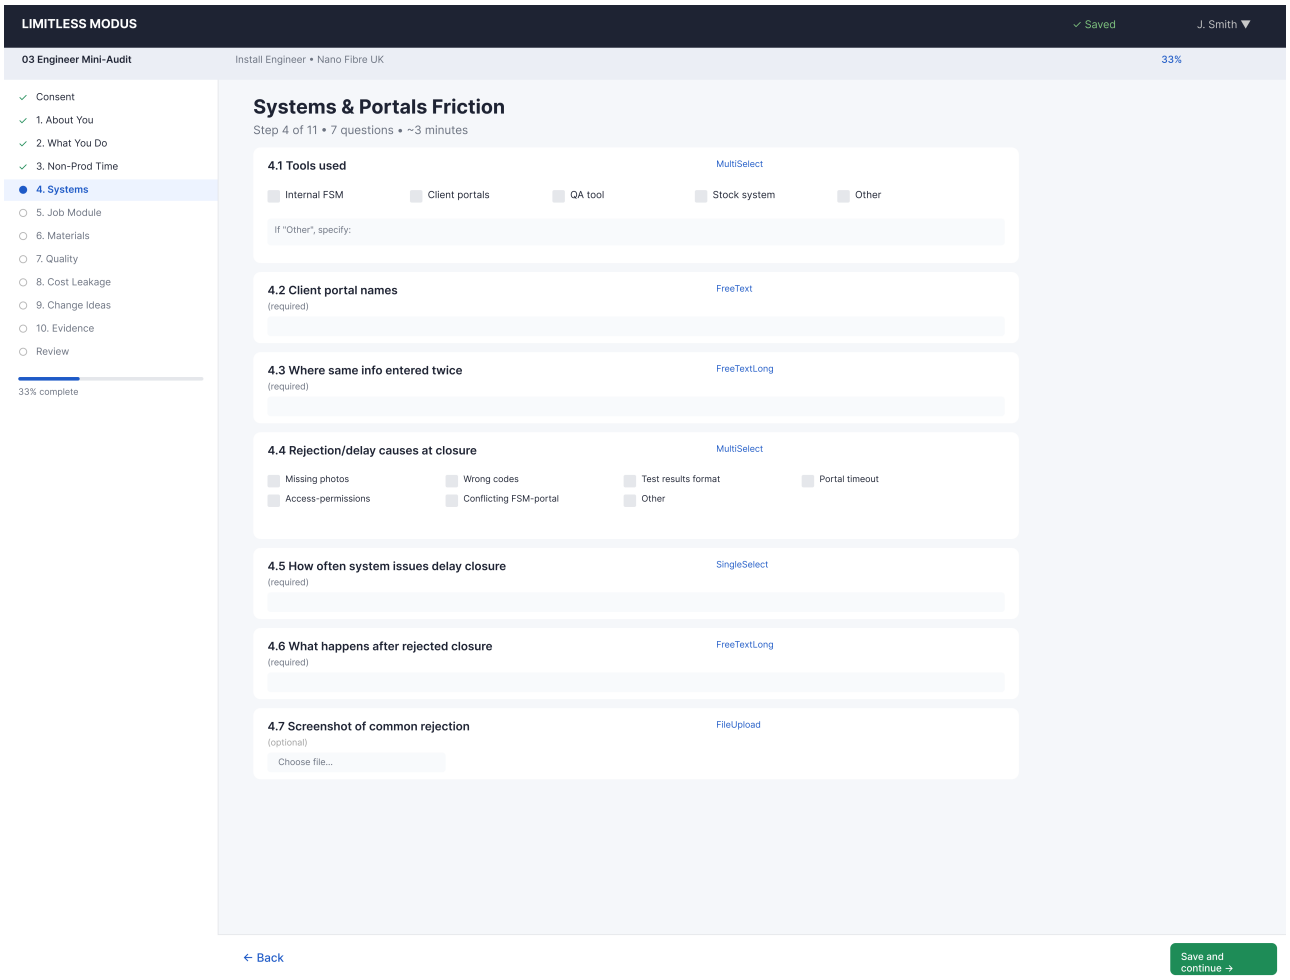
All layouts are in Figma Section "02 — Manager Audit" (`2008:4`).

Design Notes — 02

- The Manager Audit sidebar has 15 sections (Consent through Review), more than the other instruments
- Section 5 routing is driven by the department selected in Step 1 (Q1.3) — the sidebar shows "5. Operational Reality" and the content area changes based on department
- The representative layout for Section 5 variants includes a blue info banner noting that 6 other variants follow the same structure
- Step 4 (Day-in-the-Life) is the longest base step with 16 questions, split into 3 visual sub-groups
- Step 8 (People Management) is conditional on line-manager status, shown with a blue conditional banner

03 — Engineer Mini-Audit Layouts

12 layout frames covering 16 conceptual step layouts (12 base steps + 4 conditional Section 5 modules). All 4 modules are structurally similar, so one representative layout covers them all.



Representative layout: Step 4 (Systems & Portals) — the most complex step in the Mini-Audit, with 7 questions across MultiSelect, FreeText, SingleSelect, and FileUpload types.

Node Reference — 03 Engineer Mini-Audit

Step	Section	Node ID	Key Question Types
Step 0	Consent	`2011:3629`	ConsentCheckbox
Step 1	About You	`2011:3683`	FreeText, SingleSelect (routing trigger)
Step 2	What You Do	`2011:3760`	FreeText (x2), FreeTextLong
Step 3	Non-Productive Time	`2011:3821`	TableGrid (10-row), MultiSelectCapped (max 2), FreeTextLong
Step 4	Systems & Portals	`2011:3938`	MultiSelect, FreeText, FreeTextLong, SingleSelect, FileUpload
Step 5	Job Module (Representative: 5A Installations)	`2011:4042`	MultiSelectCapped (max 5), FreeTextLong — covers all 4 modules
Step 6	Materials & Inventory	`2011:4132`	SingleSelect, MultiSelectCapped (max 2), FreeTextLong
Step 7	Quality & Safety	`2011:4220`	SingleSelect (x2), MultiSelectCapped (max 3), FreeTextLong
Step 8	Cost Leakage	`2011:4300`	FreeTextLong, MultiSelect
Step 9	What Would You Change	`2011:4371`	FreeTextLong (x3)
Step 10	Optional Evidence	`2011:4432`	SingleSelect + FileUpload (conditional)
Review	Review & Submit	`2011:4494`	Summary cards (11 sections) + Submit

All layouts are in Figma Section "03 — Engineer Mini-Audit" (`2008:5`).

Design Notes — 03

- The Mini-Audit is designed for field engineers — steps are shorter with fewer questions per screen (max 7 questions vs 40+ in Company Audit)
- The sidebar has 12 sections (fewest of any instrument), reflecting the 10–12 minute target completion time
- Section 5 routing is driven by role type (Q1.2) — Install Engineer gets 5A, Service gets 5B, etc.
- Multi-skilled engineers see up to 2 modules in sequence (handled by a secondary picker question)
- The representative Section 5 layout includes a blue info banner noting that modules 5B, 5C, and 5D follow the same structure

Foundation Wireframes — Node Reference

The original 5 wireframe layouts that established the visual system:

Layout	Figma Node ID	Dimensions
Layout 1 — Wizard Shell	`2001:5`	1440 × 900
Layout 2 — Consent Step	`2002:70`	1440 × 900
Layout 3 — Profile Step	`2002:122`	1440 × 1050
Layout 4 — Review & Submit	`2002:178`	1440 × 1200
Layout 5 — Participant Dashboard	`2002:266`	1440 × 900

All layouts are inside Section "Wizard Layouts" (`2001:4`) on page "Wizard — Audit Self-submission" (`2001:3`).

Question Type Inventory

Across all three instruments, the following question types are used:

Question Type	01 Company	02 Manager	03 Engineer	Pattern Card
FreeText	x	x	x	—
FreeTextLong	x	x	x	—
SingleSelect	x	x	x	—
MultiSelect	—	x	x	`2008:6`
MultiSelectCapped	—	—	x	`2008:29`
ConsentCheckbox	x	x	x	—
ResponseMode	x	x	—	—
TableGrid	x	x	x	—
FileUpload	x	—	x	`2009:183`
NumberInput	x	x	—	`2009:162`
ChecklistUpload	x	—	—	`2009:101`
RatingScaleWithEvidence	x	—	—	`2008:67`

Next Steps

1. **Refine in Figma** — Adjust spacing, typography scale, and colour palette to final brand guidelines
2. **DevExtreme mapping** — Map question types to specific DevExtreme components (DxTextBox, DxRadioGroup, DxDataGrid, DxFileUploader, DxProgressBar, etc.)
3. **Mobile breakpoints** — Create 375px and 768px layouts; sidebar collapses to hamburger menu for Engineer Mini-Audit (field engineer primary use case)
4. **Admin dashboard layout** — Separate layout for the engagement admin view (submission tracking, viewer, export)
5. **Component library** — Extract repeated patterns (question card, section nav item, status badge) into reusable Figma components
6. **Interaction prototyping** — Link frames into a clickable prototype for user testing
7. **Conditional routing prototype** — Wire up Section 5 routing so selecting a department/role type in Step 1 navigates to the correct module
